

SAFELOCK™ ULTRA L RANGE

Laundry Solutions Outstanding Performance & Ultra Concentrated

The Safelock™ system is a bold advance in the way washing results are delivered in the laundry. Safelock™ uses super saturated concentrates to provide big results in a small pack.

This innovative, Australian Made product range is easy to use and safe for both staff and the environment.

Ultra concentrated formula means no more heavy 25L drums

Non
concentrated
formula

Safelock™
Kitchen
System

- Safelock™ Laundry Systems are provided in 5L containers.
- 2 x 5L containers are equal to 1 x 25L non concentrated formula*.
- Reduces lifting of heavy containers and saves storage space.

* Results may vary based on the type of dosing and crockery conditions

SAFELOCK™ ULTRA L RANGE

Laundry Solutions

Easy Hassle-Free Dispensing

The SAFELOCK™ self-venting dispenser is quick and easy to use – simply twist & lock.

In combination with the innovative dispensing system, The SAFELOCK™ System delivers accurate product mix whilst eliminating staff contact.

Product Range

Safelock™ L1 – Alkaline Builder

High alkaline wash additive designed to loosen dirt in the fabric during the first wash cycle. Eliminates higher dosage rates that age and destroy laundry linen. Ideal stripper of faeces and urine.

Safelock™ L2 – Detergent

Fast, effective grease emulsification and instant solubility. There is no lumping to cause dye stripping on delicate fabrics. Lemon, floral fragrance.

Safelock™ L3 – Destainer

Stabilised sodium hypochlorite used for removal of fungal growth and moulds. High sterilising and bleaching properties, excellent for the removal of blood and bodily fluid stains.

Safelock™ L4 – Conditioner

Complex blend of mild acidic builders and surfactants that neutralise and reduce Ph. Formulated to provide a concentrated and economical answer to high residual alkalinity in fabric washes.
